PROFESSIONAL SUMMARY

Software engineering candidate with hands-on internship experience in Python, C++, data curation, AI/ML, and software development. Built projects spanning frontend, backend, database connectivity, and data processing. Comfortable with debugging, unit testing, API integration, SQL, and collaborative software development workflows.

TECHNICAL SKILLS

Languages: Python, C++

AI/ML: Artificial Intelligence, Machine Learning

Web & Software Development: HTML, CSS, JavaScript, Frontend Development, Backend Development, API Integration, Unit Testing

Data & Databases: SQL, DBMS, Data Curation, Data Cleaning, Data Filtering, Data Formatting

Practices: Software Development Lifecycle, Debugging, Code Review, Team Collaboration

EXPERIENCE

NIELIT — Python Data Curation Intern | Gorakhpur, India | 06/2026 – 08/2026

- Performed data curation activities including data cleaning, filtering, labeling, and formatting to improve dataset usability.
- Used Python-based workflows to organize, validate, and prepare structured data for downstream analysis and applications.
- Worked independently and collaboratively while maintaining attention to data quality, consistency, and project requirements.

MMMUT — AI/ML Intern | Gorakhpur, India | 05/2026 – 06/2026

- Supported AI/ML internship activities involving data preparation, model-oriented workflows, and technical problem solving.
- Assisted with day-to-day project operations and collaborated with team members to complete assigned technical tasks.
- Applied programming and analytical skills to improve understanding of practical machine-learning development workflows.

Mecatredz Technology Pvt. Ltd. — IoT Intern | Lucknow, India | 07/2023 – 08/2023

- Developed software solutions in Python and C++ for project-specific requirements in an IoT development environment.
- Collaborated with senior engineers on project development, debugging, and implementation tasks.
- Strengthened practical software engineering skills through hands-on development, testing, and team-based problem solving.

PROJECTS

SwiftDrop: Full-stack delivery application integrating frontend, backend, database, and API-based functionality. Developed using HTML, CSS, JavaScript and backend technologies.

Job Listings Data Curation: Collected and curated job-listing data with cleaning, filtering, formatting, and structured organization to make the dataset suitable for analysis/search workflows.

Student Performance Prediction: Machine-learning project focused on using student-related data for performance prediction and applying data-processing/model-development concepts.

EDUCATION

B.Tech — Information Technology — Deen Dayal Upadhyaya Gorakhpur University, Gorakhpur, India | Expected 07/2027 | GPA: 7.6

Diploma in Engineering — Electronics Engineering — Government Girls Polytechnic, Gorakhpur | 08/2024 | Percentage: 75%

High School — Springer Loreto Junior High School, Gorakhpur, Uttar Pradesh | 04/2021 | Percentage: 71%

LEADERSHIP & RESPONSIBILITY

- Team leadership and management responsibilities at Mecatredz Technology Pvt. Ltd.
- Worked collaboratively with senior engineers and team members on software/project development.

LANGUAGES

English — Advanced (C1) | Hindi — Proficient (C2)
